Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 December 2004.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Lewandowski.

The Lewandowski reference discloses a container comprising a compartment/upper portion 21 containing a personal care product (soap), and a rotatable activator switch/lower portion 24 capacitively (38, 38', 38'') connected to a sound output device/electronic component 34, the switch dispensing the soap and simultaneously activating the output device for a fixed, predetermined time (see col. 1, lines 49-62). Regarding claim 5, note that the axis which switch 24 pivots about can be considered a "central longitudinal axis" of both the switch and container. Regarding claim 9, note battery 35.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chiu in view of Lewandowski.

The Chiu reference discloses container comprising a compartment/upper portion 11 containing a personal care product (lipstick), a rotatable activator switch/lower portion 20' connected to a sound output device/electronic component 53, and a battery (see Fig. 3), the switch dispensing the soap and simultaneously activating the output device (see col. 2, line 61- col. 3, line 8). Regarding claims 6 and 7, note that the lower portion can be rotated a single revolution or less to activate the sound output device. The Chiu reference does not disclose a capacitor in the circuit which stops the sound after a fixed, predetermined time. However, the Lewandowski reference discloses a similar container as discussed supra including a capacitor in the circuit which causes the sound to stop after a fixed, predetermined time, in part so that the battery does not prematurely drain upon continued actuation of the switch. It would have been obvious to employ a capacitor in the circuit of the Chiu device which stops the sound after a fixed predetermined time in view of Lewandowski so that the battery does not prematurely drain upon continued actuation of the switch.

Response to Arguments

Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
